---

Professional Experience

Front End Developer, *Command Credit* ⧉   05/2023 – 07/2025
                                                                               Rhinebeck, New York

- Collaborated on the design system by creating consistent spacing, typography, and component patterns directly from Figma to production.
- Developed reusable React components to speed up development and maintain visual consistency across the site.
- Implemented responsive layouts and mobile-first design to ensure a seamless experience across all devices.
- Optimized page performance through efficient component structure, image optimization, and Tailwind utility patterns.
- Worked closely with stakeholders to refine UI/UX, iterate on designs, and incorporate feedback quickly.
- Ensured accessibility best practices, including semantic HTML and ARIA considerations.
- Integrated animations and micro-interactions to improve user engagement and overall UI polish.
- Conducted QA on all pages, identifying and fixing layout, styling, and functional issues before launch.
- Managed version control using GitHub and collaborated through pull requests and code reviews.
- Helped shape the site architecture to support future scalability and maintainability.

Production Assistant, *Selling The OC, Netflix*   01/2023 – 05/2023
                                                                               Irvine, CA

- Maintained and organized production equipment and supplies
- Assisted with on-set activities, such as handling technical issues
- Ensured that all relevant paperwork and releases are completed in a timely manner

Projects

Kate Brubaker Fitness and Nutrition, *Designed and developed katebrubaker.com, a full website for a fitness instructor offering private events, weekly fitness classes, and custom meal plans* ⧉
- Created the full visual design system and page layouts tailored to the client's fitness brand, services, and audience.
- Developed the entire site using Next.js, React, and Tailwind, including all pages, components, and content sections.
- Highlighted key offerings such as private group events, weekly fitness classes, and personalized meal plans through clear UX and intuitive navigation.
- Built a fully responsive, mobile-first experience optimized for clients browsing on phones.
- Enhanced the experience with smooth interactions, polished layouts, and clean visual hierarchy.
- Implemented SEO best practices and structured content to improve discoverability for local fitness clients.
- Optimized performance via efficient component architecture, image optimization, and accessibility-minded HTML.
- Managed version control, deployment, and updates using GitHub and Vercel.
- Collaborated directly with the instructor to refine copy, service descriptions, and the overall user journey.

Dota 2 Data,
A dynamic HTML, CSS, and JavaScript application for Dota 2 players who want to view their game statistics ⧉
- Utilized **OpenDOTA API** that lets users view their profile statistics and games played
- Provided a search bar for the user to be able to view profile and input player ID using **JavaScript**

Portfolio Website, *Designed and developed a personal portfolio website using HTML, CSS, and Bootstrap. The website showcases my skills, education, experience, projects, and contact information.* ⧉
- Responsive design using **Bootstrap** grid system
- Customized color scheme and typography using **CSS** and **Bootstrap**
- Clean and organized code structure using semantic **HTML** and **CSS** classes

Education

LearningFuze Accelerated Web Development Program   Irvine, CA
Programmed 10-12 hours a day for 14 weeks (800+ hours) in a simulated Agile work
environment
