Summary

Front End Developer with 2+ years of experience building responsive, accessible, and performance-focused web applications using React, TypeScript, Next.js, and Tailwind CSS. Experienced translating Figma designs into scalable component systems and collaborating in Agile environments.

Skills

JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive & Mobile-First Design, Accessibility (ARIA, Semantic HTML), REST APIs, JSON, Git, GitHub, Agile/Scrum, Performance Optimization, Figma to Production, On-Page SEO

Professional Experience

Front End Developer — Command Credit Corp

May 2023 – July 2025 | Rhinebeck, NY

- Built reusable React components by translating Figma designs into production-ready UI, ensuring consistent design and scalability.
- Developed responsive, mobile-first layouts optimized for desktop and smartphone users.
- Improved page performance through optimized component structure and image handling using Tailwind CSS.
- Collaborated with designers and stakeholders to iterate on UI/UX and rapidly implement feedback.
- Applied accessibility best practices using semantic HTML and ARIA attributes.
- Added animations and micro-interactions to enhance user engagement and UI polish.
- Conducted QA across pages, resolving layout, styling, and functional issues before launch.
- Managed version control with GitHub and participated in pull requests and code reviews.

Production Assistant — *Selling The OC*, Netflix

January 2023 – May 2023 | Irvine, CA

- Supported fast-paced production environments by organizing equipment and assisting with technical troubleshooting.
- Coordinated documentation and ensured releases were completed accurately and on time.

Projects

Kate Brubaker Fitness & Nutrition — katebrubaker.com

- Designed and developed a full production website using Next.js, React, and Tailwind CSS.
- Built a custom design system aligned with the client's brand and services.
- Delivered a fully responsive, mobile-first experience and implemented on-page SEO.
- Managed deployment and updates using GitHub and Vercel.

Dota 2 Data — giancarlomassoni.github.io/dota2-data

- Built a JavaScript application integrating the OpenDOTA API to display player statistics.
- Implemented search functionality allowing users to query player profiles by ID.
